Nicolas Bezerra Bini

Software Engineer | Java, Spring Boot, Backend

Osasco, SP, Brazil | +55 (11) 95871-0404 | nicolasbbini@gmail.com | linkedin.com/in/nicolas-bezerra-bini | github.com/niicsz

SUMMARY

Software Engineer at Bradesco, one of Brazil's largest banks, building Java and Spring Boot backend services for banking systems: an OTP platform handling 2M+ requests per day, document validation for customer onboarding, and an internal developer platform used by 500+ engineers. Hands-on with Apache Kafka, SQL Server, MongoDB, Azure, Docker and Linux. Microsoft Certified: Azure Fundamentals (AZ-900), currently pursuing an MBA in Software Engineering at the University of São Paulo (USP).

WORK EXPERIENCE

Software Engineer I | Bradesco | Osasco, SP, Brazil (Hybrid) | Feb 2025 - Present

Bex for Dev - Platform Engineering

- Contribute to Bradesco's Backstage-based Internal Developer Platform, supporting developer experience initiatives for 500+ internal developers.
- Created "Bex Dev Local", a shell script that automates project setup, build and start, reducing local environment setup from hours to about 10 minutes.
- Delivered the external images offering, providing CVE-free Docker Hub images and cutting provisioning time by about 60%.
- Support the bank's Red Hat Linux adoption pilot, on both RHEL laptops and WSL, letting developers choose Linux or Windows at onboarding; enabled GitHub Copilot CLI on RHEL distros via WSL. Daily work with Podman and Docker.

DocMatch - Document Analysis

- Integrated Serasa APIs into onboarding and identity verification workflows to validate and authenticate documents, cutting average verification time by about 30%.
- Supported 500,000+ document validations per month using MongoDB and SQL Server; optimized queries, reducing latency from 800 ms to 250 ms.

Btoken - Bradesco Corporate Token

- Delivered 20+ new features for Bradesco's Btoken Authentication service, an OTP generation system used across multiple banking channels (2M+ requests per day), strengthening security and enhancing user experience for millions of users.
- Achieved a 500% performance improvement in the authentication service by analyzing and optimizing SQL Server queries affected by inefficient VARCHAR handling.
- Designed and maintained event-driven integrations using Kafka, ensuring reliable communication between distributed services.
- Provided L3 customer support, diagnosing production incidents, performing root cause analysis, and implementing sustainable fixes to maintain high service availability.
- Integrated Source Formatter into the CI/CD pipeline, improving code quality, maintainability, and consistency across the team; reached 95% test coverage on SonarQube with JUnit 5 and Mockito.
- Championed workflow improvements, introducing better task management practices that increased team efficiency and delivery predictability.
- Built Spring Boot microservices and REST APIs documented with Swagger/OpenAPI, using Azure for cloud, SQL Server for persistence and Databricks for analytics.

PROJECTS

Portfolio Interview API (github.com/niicsz/portfolio-interview-api): API behind the "Interview me" assistant on my portfolio. RAG with local embeddings and Claude, with layered prompt injection defenses. Java 25, Spring Boot, hexagonal architecture, API first.

BiniTech PDV (github.com/niicsz/BiniTech-PDV): Multi-tenant SaaS point-of-sale platform with per-store data isolation and Stripe subscription billing. Java 21, Spring Boot 3, hexagonal architecture, API first, MongoDB, Redis caching, RabbitMQ and a separate authentication service (JWT, Argon2); Angular 21 frontend.

SKILLS

- **Backend:** Java, Spring Boot, REST APIs, Swagger/OpenAPI, microservices, JUnit 5, Mockito
- **Messaging and data:** Apache Kafka, Microsoft SQL Server, MongoDB, MySQL, Databricks
- **Cloud and DevOps:** Microsoft Azure, Docker, Podman, Linux (RHEL, WSL), Shell scripting, Backstage, Git, GitHub
- **Frontend:** TypeScript, Angular, JavaScript, HTML, CSS
- **Languages:** Portuguese (native), English (B2 Upper Intermediate, EF SET)

EDUCATION

- **MBA in Software Engineering (in progress)** - University of São Paulo (USP) (Aug 2026 - 2028)
- **Associate Degree in Systems Analysis and Development** - Universidade São Judas Tadeu (USJT) (Feb 2024 - Jun 2026)
- **Technical Degree in Systems Development** - Fundação Instituto Tecnológico de Osasco (FITO) (Jan 2020 - Dec 2023)

CERTIFICATIONS

- GH-900 Microsoft Certified: GitHub Foundations - Microsoft (Oct 2026)
- Angular (Intermediate) Certificate - HackerRank (Oct 2026)
- Software Engineer Certificate - HackerRank (Oct 2026)
- GH-300: GitHub Copilot Certification - Microsoft (May 2026)
- AZ-900 Microsoft Certified: Azure Fundamentals - Microsoft (Jun 2025)
- Databricks Fundamentals Accreditation - Databricks (May 2025)
- Java (Basic) Certificate - HackerRank (Oct 2024)
- EF SET English Certificate, B2 Upper Intermediate - EF SET (Aug 2024)

COURSES

- Java Architecture Track - The Developer's Conference (Sep 2026)
- Red Hat Application Development I: Programming in Java EE - Red Hat (Mar 2026)
- Java Best Practices Track - Alura (Jun 2025)
- Oracle Academy Java for AP Computer Science A - Oracle (Nov 2024)
